Presentation

Graduated in Analysis and Development of Systems, currently I am a Magento Developer on Redstage Wolrdwide from Jersey.

Professional background

- *Redstage Worldwide* – Mar 2019 – Today (Magento developer)

Technologies: Magento, Bigcommerce, Docker.

- *Kolina Labs* – Jun 2018 – Feb 2019 (Frontend developer)

Responsible for the development of new functions and maintenance of the solar panel system of Sices Brasil, the largest producer of solar panels in Latin America. As a Front-end developer, I have been using tools such as VueJs, webpack, sass, etc.

I also worked as a BI developer in the development of a panel using QlikSense.

Technologies: VueJS, Vuex, Sass, Docker, QlikSense BI.

- *Unimed Brasil Cooperativa de Trabalho Médico* – Jun 2015 – Jun 2018 (Analyst and Developer of Systems)

I was responsible for the development of systems such as fullstack developer, from requirements gathering to development, deployment, testing and support. As the only Unimed developer in this period in which I worked, I developed around 12 systems using the Laravel

framework, and two blogs in WordPress to create documentation of the developed systems, extensions registers, central links of programs used inside the Intranet of the cooperative , etc.

Technologies: PHP, Laravel, SQL Server, MySQL, OOP, SublimeText, HTML5, CSS, Javascript, jQuery, Scrum, GIT, Linux.

- Fluxo TI **- Mar 2015 – Jul 2015 (Fullstack developer)**

Technologies: PHP, Laravel, SQL Server, MySQL, OOP, SublimeText, HTML5, CSS, Javascript, jQuery, Scrum, GIT, Linux, PHPCI.

- K13 Agência Digital - **Aug 2013 – Mar 2015 (Fullstack developer)**

Technologies: PHP, Zend, Zend 2, AngularJS, SQL Server, MySQL, OOP, SublimeText, HTML5, CSS, Javascript, jQuery, Scrum, GIT, Linux.
